

The 72 Divinities

Our planet is ruled by 72 divinities that reside in the 23rd dimension. They are divided into three groups of 24 : the divinities of the inner Earth, the terrestrial divinities and the divinities from around the Earth.

All these divinities are governed by the supreme deity of our solar system, Yahve, perceptible in the form of an immense column of energy 6000 km high. Yahve manifests mainly in the 67th dimension of the 1st octave. Each octave consists of 72 dimensions and there are 7 octaves in our galaxy.

The 24 terrestrial divinities are at the origin of the religions that gave them their names. Some have several names and are venerated in different religions. Each of these divinities also possess a real name, anterior to the creation of the religions.
