111	Honoring the Presences

BIOMETERS

The biometers are scales for making measurements through dowsing. By asking a clear question and by following the biometer with a finger (or a pendulum), you will feel a denser energy (tickling or vibration), at the moment your finger passes over the correct value.

Page 114 : biometer of **answers**, to use if you are having difficulty communicating with clairsentience.

Page 115 : **universel** biometer which can be used for measuring anything, from the depth of an underground water course, to your immunity level. It's up to you to place the unity of measure that seems the most appropriate.

Pages 116 et 117 : biometers to measure the **vibratory rate** (in percentages or in Bovis units) of places, objects, food and anything around you.

Page 118 : biometer to determine the **dimension** of a presence to help recognise it.

Page 119 : biometer to identify the **hierarchy** the presence is in.

Page 120 : this biometer is made up of the letters of the **alphabet** to help you discover the names of the invisible presences you meet.

Page 121 : the biometer of **entities** that will help you know in which particular situation a dead person is found.

Page 122 : biometer to measure the level of **radiation** (could be useful in our times).

Page 123 : biometer of **authorisations** to check if you can or can not undertake a precise action.
